DeFi Insurance Protocol

MODERN SECURED DECENTRALIZED

@DFIP

What is DFIP token

The DFIP token is the central connecting element in the DeFi Insurance ecosystem. Through DFIP, users can purchase insurance products built on the DeFi Insurance Protocol. Any client can purchase insurance at a discount for DFIP tokens.

Also, DFIP holders get a unique opportunity to become a jury and earn on voting on insurance payments. Each request for an insurance payment is moderated through the pool of holders. Each DFIP holder receives a voting commission proportional to the number of tokens in his wallet.

In addition, any holder of DFIP > 50,000 is given the opportunity to earn on staking ETH and DFIP in insurance liquidity pools. The holder will receive 70% of the commission received by the smart contract for the provision of the insurance product.

Providing the following information we would like to introduce a comprehensive and transparent understanding about DFIP's usage and its long-term value

Name of the Application

DFIP (DeFi Insurance Protocol)

Access Coin for Using our Software

DFIP

Symbol

DFIP

Number of Decimals

8

Blockchain

Ethereum

Nature

Utility Token

Utility

It is used to get access to DeFi Insurance Protocol products, purchase at a discount, participate in the jury-staking program, and access liquidity pools with returns in ETH

Scope

The 500,000 ETH in DeFi Insurance Protocol Pool will open the opportunity for DFIP team to use additional DFIP for covering costs.

These DFIP cannot be traded or transferred to OTC market.

3 BILLION

DFIP tokens were issued in total

1 BILLION

DFIP tokens were sold in private investment round with 0,01\$ price and have to be frozen for 12 months

500,000,000 DFIP tokens allocated for Hackatons and New products on DeFi Insurance Protocol funding

200,000,000 DFIP tokens allocated for team have been frozen till DeFi Insurance Protocol pool will reach 500,000 ETH

800,000,000 DFIP tokens allocated for future partnerships

500,000,000 DFIP tokens will be used for funding Insurance liquidity pool

Running cost for a 3rd party DeFi Insurance Product on our Protocol

One of the major benefits

If any company would like to run their own
Product they need:

- Hold 1,000,000 DFIP on their wallet
- Add to the main liquidity pool 500 ETH
- Proceed full independent product audit
- Proceed official company documents

Revenues shall be used as follows:
